### **Free LAANC Course Shows Drone Pilots How to Quickly Get ATC Clearance to Fly in Controlled Airspace**

September 17, 2018 San Diego, CA Drone pilots can take a new free King Schools course titled [\*Using LAANC to Fly Drones in Controlled Airspace\*](#) to learn how to use the FAA Low Altitude Authorization and Notification Capability. The online course includes HD video and bullet points followed by interactive questions to test your knowledge.

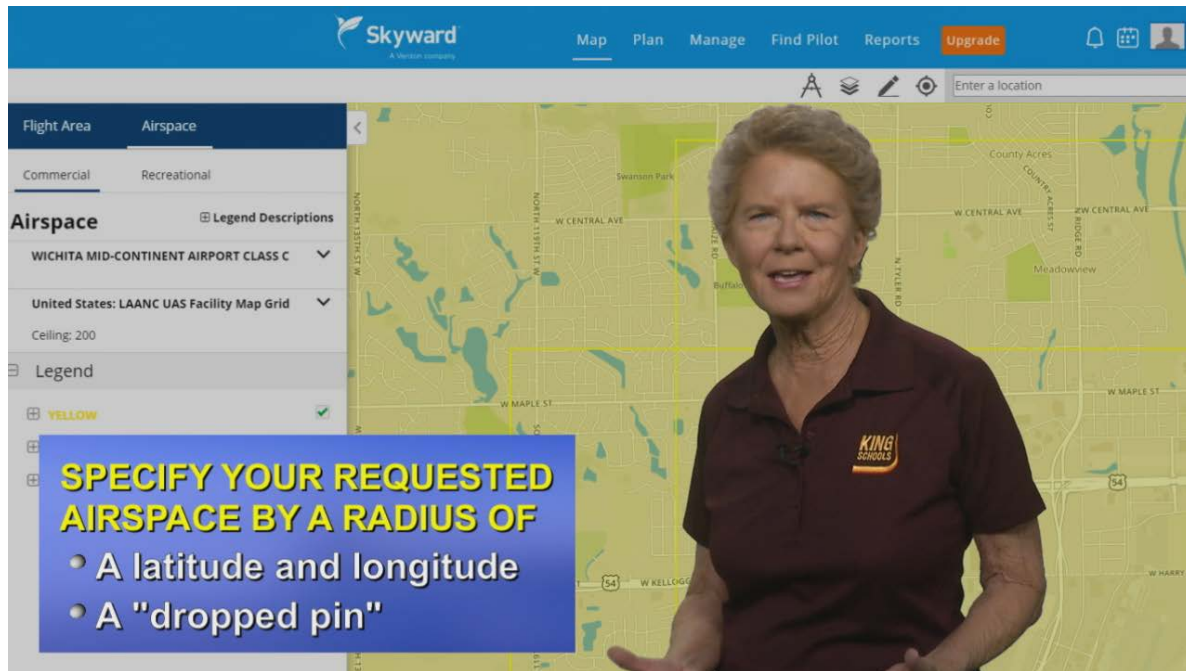

Low Altitude Authorization and Notification Capability, pronounced “[LANCE](#),” is the result of a partnership effort between the FAA and private industry. LAANC enables drone pilots to access controlled airspace near airports through near real-time processing of airspace authorizations. In this course, Co-Chairman of King Schools Martha King explains how operators of drones can get that authorization.

King Schools CEO Barry Knuttila explained, “The FAA has made it possible, but navigating the system is not easy. In this course you will find simple, clear tips and information that can speed you on your way to getting the most from LAANC. We have also added this LAANC information to updated versions of our Drone Pilot License initial test prep course.”

The [\*Using LAANC to Fly Drones in Controlled Airspace\*](#) course covers topics including:

- UAS Facility Maps
- Approved LAANC UAS Service Suppliers (USS)
- B4UFLY FAA Mobile App
- FAA’s [DroneZone](#)
- Airspace Authorization and Waivers

The LAANC course is available for FREE at [KingSchools.com/LAANC](http://KingSchools.com/LAANC).

Martha King is the Instructor in this free course that explains how LAANC enables drone pilots to access controlled airspace near airports through near real-time processing of airspace authorizations.

#### About King Schools

For over 40 years, students and pilots at all levels have enjoyed King Schools' clear, simple and fun video courses. King Schools estimates that over 50% of the pilots flying in the U.S. today have learned with King. The company is also a leader in on-line pilot certification and avionics training for pilots of high-performance and turbine aircraft.
